

K / 1 Classroom

Teacher: Ellen Rossi

Education Support Professional: Fallon Pulford

Our goal in this program is to provide a nurturing environment that facilitates and promotes each individual child’s physical, cognitive and social-emotional growth. We believe that children learn best through meaningful hands-on experiences. We will provide the materials and learning activities that encourage the children to develop and use their emerging skills. Each child enters school with a unique style and varying capabilities. We will look at each child’s capabilities and encourage him/her to use and extend these skills. Our aim is to establish a warm and safe environment so children can grow happily and become life-long learners. Children are naturally curious and have an innate drive to strive toward mastery and competence. We work to make each child successful.
